## CLASSIFICATION

Previous to 1922 each Branch of the Department of Agriculture had its own system of classifying its publications. A new classification instituted at that time consolidated the publications into a departmental system. This classification, designated the New Series, includes Circulars, Pamphlets, and Bulletins according to size and importance, and a fourth series covering Acts, Orders and Regulations. Each of these four series is numbered consecutively from one upwards. The Reports of the Department are issued as in the past.
